2 + 4 = 6

This panel shows a math problem using candy. On the left, there are 2 blue candies. In the middle, there are 4 pink candies. On the right, there are 6 candies in total (2 blue and 4 pink). Below the candies, the numbers 2, 4, and 6 are shown in a dashed format for tracing. Each number has numbered arrows indicating the stroke order: 1 for the first stroke and 2 for the second stroke. The number 2 is formed by a curved line down and a horizontal line to the right. The number 4 is formed by a diagonal line down and a horizontal line to the right. The number 6 is formed by a horizontal line to the right and a curved line down.

5 + 3 = 8

This panel shows a math problem using candy. On the left, there are 5 blue candies. In the middle, there are 3 pink candies. On the right, there are 8 candies in total (5 blue and 3 pink). Below the candies, the numbers 5, 3, and 8 are shown in a dashed format for tracing. Each number has numbered arrows indicating the stroke order: 1 for the first stroke and 2 for the second stroke. The number 5 is formed by a horizontal line to the right, a vertical line down, and a curved line from the top to the bottom. The number 3 is formed by a horizontal line to the right and a curved line from the top to the bottom.

3 + 2 = 5

This panel shows a math problem using candy. On the left, there are 3 blue candies. In the middle, there are 2 pink candies. On the right, there are 5 candies in total (3 blue and 2 pink). Below the candies, the numbers 3, 2, and 5 are shown in a dashed format for tracing. Each number has numbered arrows indicating the stroke order: 1 for the first stroke and 2 for the second stroke. The number 3 is formed by a horizontal line to the right and a curved line from the top to the bottom. The number 2 is formed by a horizontal line to the right and a curved line from the top to the bottom.

1 + 6 = 7

This panel shows a math problem using candy. On the left, there is 1 blue candy. In the middle, there are 6 pink candies. On the right, there are 7 candies in total (1 blue and 6 pink). Below the candies, the numbers 1, 6, and 7 are shown in a dashed format for tracing. Each number has numbered arrows indicating the stroke order: 1 for the first stroke and 2 for the second stroke. The number 1 is formed by a vertical line down. The number 6 is formed by a horizontal line to the right and a curved line from the top to the bottom.
