

● 次の分数のたし算をしましょう。

$$1 \quad \frac{1}{6} + \frac{8}{7}$$

$$= \frac{7}{42} + \frac{48}{42}$$

$$= \frac{55}{42} \left( 1 \frac{13}{42} \right)$$

$$2 \quad \frac{1}{5} + \frac{3}{2}$$

$$= \frac{2}{10} + \frac{15}{10}$$

$$= \frac{17}{10} \left( 1 \frac{7}{10} \right)$$

$$3 \quad \frac{1}{2} + \frac{9}{7}$$

$$= \frac{7}{14} + \frac{18}{14}$$

$$= \frac{25}{14} \left( 1 \frac{11}{14} \right)$$

$$4 \quad \frac{7}{5} + \frac{3}{4}$$

$$= \frac{28}{20} + \frac{15}{20}$$

$$= \frac{43}{20} \left( 2 \frac{3}{20} \right)$$

$$5 \quad \frac{4}{9} + \frac{6}{5}$$

$$= \frac{20}{45} + \frac{54}{45}$$

$$= \frac{74}{45} \left( 1 \frac{29}{45} \right)$$

$$6 \quad \frac{1}{3} + \frac{5}{4}$$

$$= \frac{4}{12} + \frac{15}{12}$$

$$= \frac{19}{12} \left( 1 \frac{7}{12} \right)$$

$$7 \quad \frac{11}{7} + \frac{2}{5}$$

$$= \frac{55}{35} + \frac{14}{35}$$

$$= \frac{69}{35} \left( 1 \frac{34}{35} \right)$$

$$8 \quad \frac{3}{8} + \frac{9}{7}$$

$$= \frac{21}{56} + \frac{72}{56}$$

$$= \frac{93}{56} \left( 1 \frac{37}{56} \right)$$
