

● 次の分数のたし算をしましょう。

$$1 \quad \frac{1}{2} + \frac{5}{7}$$

$$= \frac{7}{14} + \frac{10}{14}$$

$$= \frac{17}{14} \left(1 \frac{3}{14} \right)$$

$$2 \quad \frac{5}{6} + \frac{3}{7}$$

$$= \frac{35}{42} + \frac{18}{42}$$

$$= \frac{53}{42} \left(1 \frac{11}{42} \right)$$

$$3 \quad \frac{1}{2} + \frac{5}{9}$$

$$= \frac{9}{18} + \frac{10}{18}$$

$$= \frac{19}{18} \left(1 \frac{1}{18} \right)$$

$$4 \quad \frac{4}{7} + \frac{5}{9}$$

$$= \frac{36}{63} + \frac{35}{63}$$

$$= \frac{71}{63} \left(1 \frac{8}{63} \right)$$

$$5 \quad \frac{3}{4} + \frac{5}{8}$$

$$= \frac{6}{8} + \frac{5}{8}$$

$$= \frac{11}{8} \left(1 \frac{3}{8} \right)$$

$$6 \quad \frac{3}{8} + \frac{5}{4}$$

$$= \frac{3}{8} + \frac{10}{8}$$

$$= \frac{13}{8} \left(1 \frac{5}{8} \right)$$

$$7 \quad \frac{3}{5} + \frac{7}{10}$$

$$= \frac{6}{10} + \frac{7}{10}$$

$$= \frac{13}{10} \left(1 \frac{3}{10} \right)$$

$$8 \quad \frac{2}{3} + \frac{7}{15}$$

$$= \frac{10}{15} + \frac{7}{15}$$

$$= \frac{17}{15} \left(1 \frac{2}{15} \right)$$
